How to install Read and Write at home
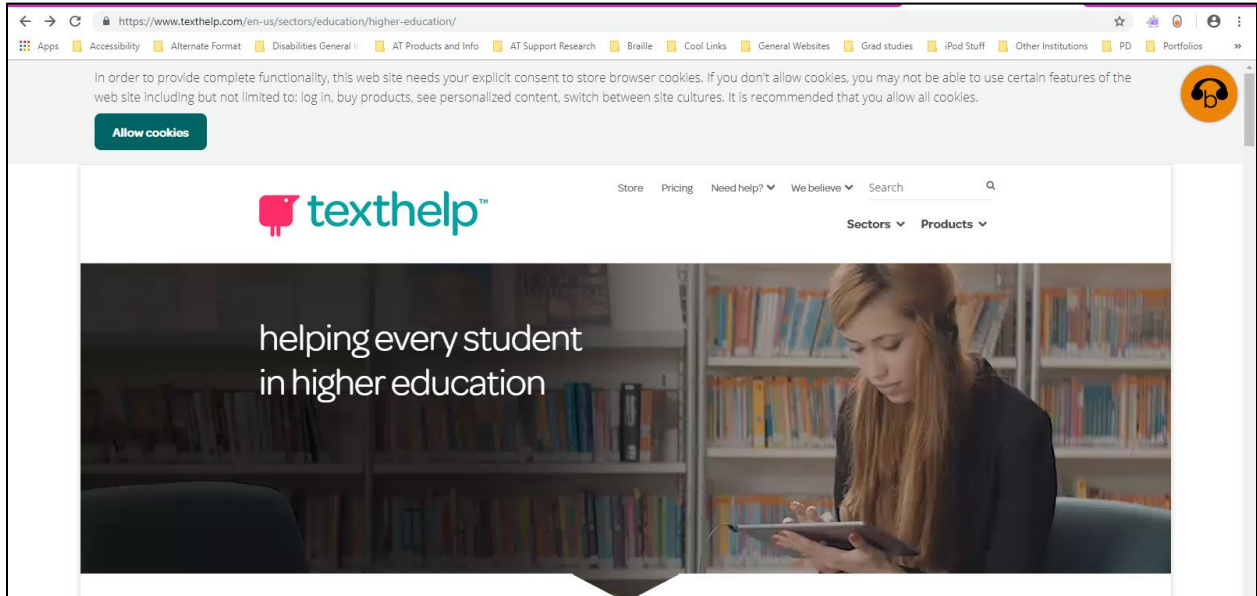

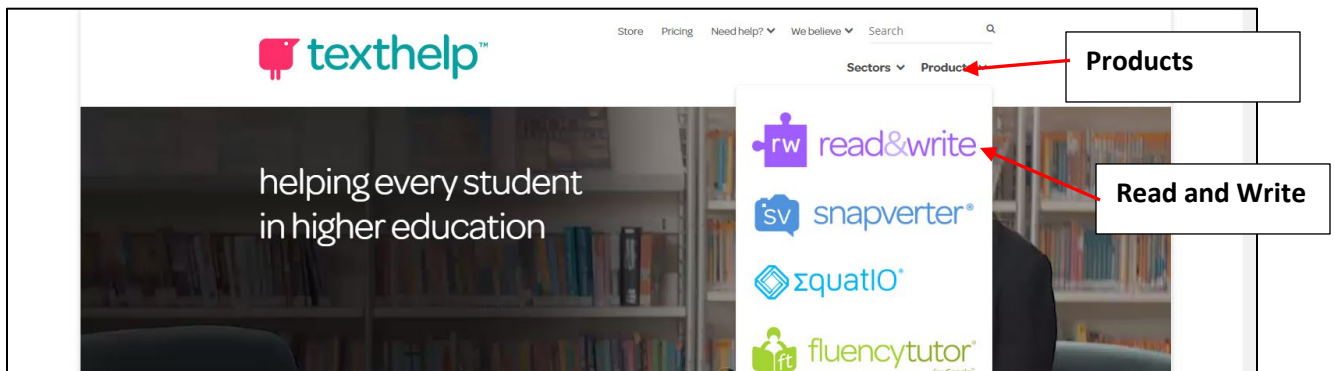

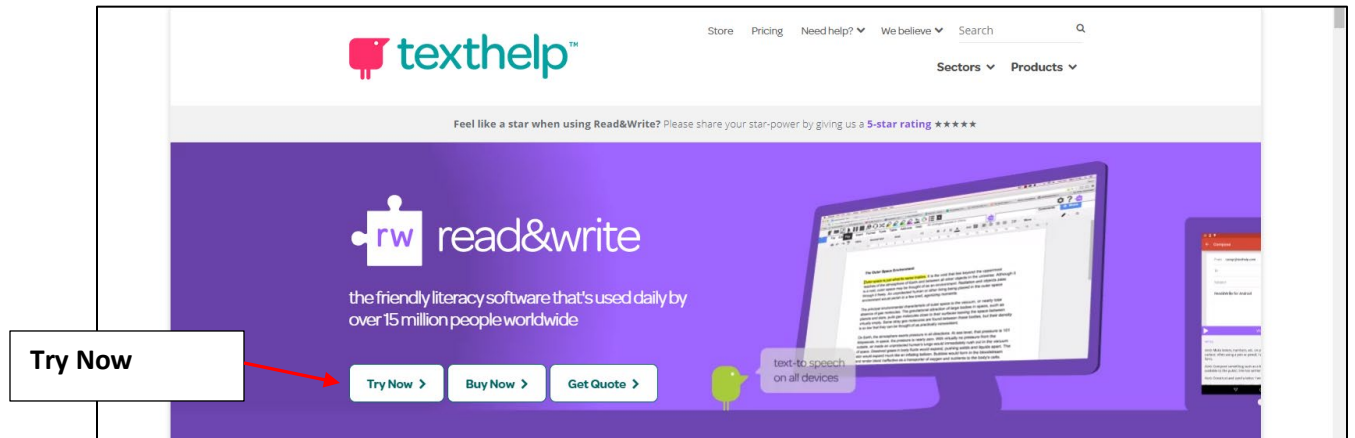

1) Start by going to Texthelp.com

2) Hover over "Products" and then click on Read and Write in the drop down that pops up.

3) On the next screen, click on Try Now

Try Now

4) The screen should scroll down a bit and show you a number of different options

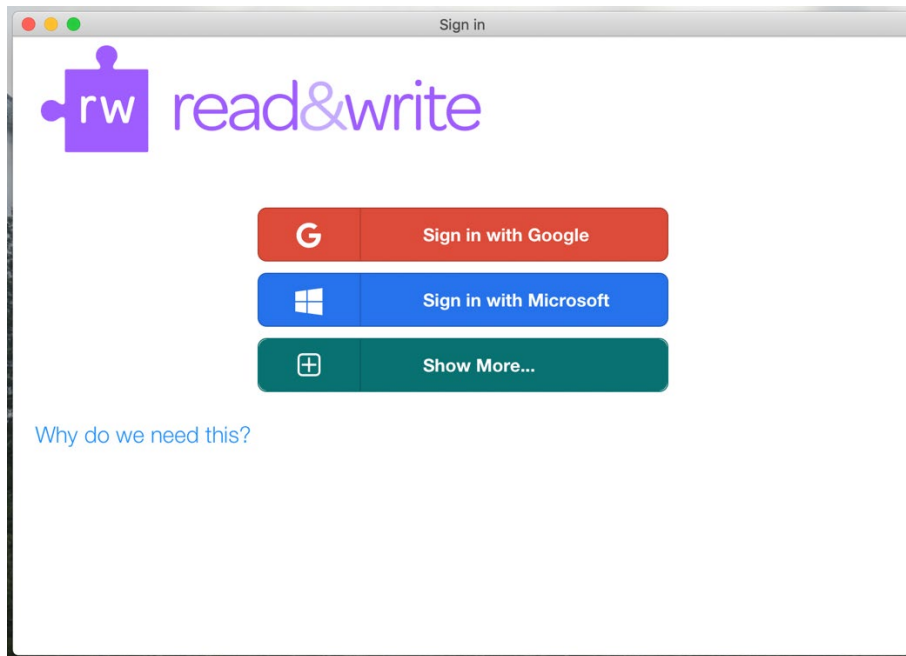

5) Click on MacOS
6) Click on Try Now
7) Wait for the software to download and then run the install.
8) A window will pop up asking you to drag the big purple puzzle piece icon to your Applications folder. Go ahead and do this. It may also ask you to change a couple of settings – you are just going to want to follow those instructions to get all the settings
9) Open your Applications folder and double click the purple puzzle piece icon to start Read and Write.

10) The first time you run Read and Write, a pop-up asking you to sign in will appear on screen.

11) In the list of options, pick **Microsoft**
12) In the first sign-in window, type in your full MyBVC email address including **@mybvc.ca**). Click on **Next** to continue.

13) In the next login window, type in your MyBVC password to log in (the same password you use to log into D2L and MyBVC). Click on **Sign in** to continue.

14) That's it! You should now be logged in and ready to use Read and Write.

Note: Read and Write should remember your information and automatically sign-in every time your computer is restarted. However, you may periodically be asked to log in again to verify that you are still a BVC student. Please follow the same instructions to reactivate your Read and Write.
