

Four conditions need to be met for learners to view their quiz attempt(s), including the questions, student answers, correct answers, and any question or overall feedback the instructor may have provided. Instructors and learners can access quizzes from *Assessments > Quizzes* on the navbar.

- The first two conditions need to be met in *Edit Quiz* page, accessible from *Edit* option in the context menu.
- Third condition needs to be met after quiz grades and feedback are finalized from the *Grade Quiz* page; accessible from *Grade* option in the context menu.
- The fourth and last condition is communicating instructions on how to access the feedback to the students.

1. Quiz must be available to students

In the *Edit Quiz* page:

The quiz must be *Visible*.

In the *Availability Dates & Conditions* tab, if *Start Date* and *End Dates* are set, the period you want the students to view their quiz feedback should fall within these dates and times.

2. Questions are visible in the submission view

In the *Edit Quiz* page, *Evaluation & Feedback* tab:

The Default option is to show the students *No questions*. Modify this and choose the option that is suitable for this quiz.

You can choose from a combination of options. For example, you can choose to show all questions or only show the questions that they did not answer correctly. You can also show the correct answers or not.

If the drop-down options don't meet your needs, *Customize Quiz Results Displays* link will provide more customization options.

Save and Close the *Edit Quiz* page.

3. Quiz results are published

From the quiz context menu, choose the *Grade* option.

In the *Grade Quiz* page, list of attempts, make sure the quiz attempt results are published:

		Reset	Publish Feedback	Retract Feedback			
<input type="checkbox"/>	Last Name ▲, First Name	Completed	Score	Grade	Status		
<input type="checkbox"/>	Instructor						
<input type="checkbox"/>	attempt 1	Aug 20, 2019 2:02 PM	5 / 5	A+	Published		
	overall grade (highest attempt)		5 / 5	A+			

The *Status* indicates that the quiz results are published – i.e., visible to students. If it is not, Select the attempt (or all attempts) and click *Publish Feedback* option above the list.

4. Students know how to access their attempts and feedback

Give instructions to your students on how to view their quiz results.

Without Category	Evaluation Status	Attempts
Review Quiz: Chapter 1 ▼	Feedback: On Attempt	1 / Unlimited

Students need to click the *On Attempt* link next to their quiz name.

Then click on any attempt link for details of questions you have allowed them to see in the setup of the quiz (Step 2 above) and your feedback.

Individual Attempts	Grade
Attempt 1	16 / 30 - D
Overall Grade (highest attempt):	16 / 30 - D
